

Rajesh Bogadi

Full Stack Developer

I'm a Full Stack Developer with 1+ year of freelance experience and 3 months as a Software Trainee. I specialize in building user-friendly web solutions with React.js, Tailwind CSS, Node.js, and Express.js. My projects span diverse industries, delivering clean, maintainable, and efficient code. Skilled in agile development, version control, and collaborative workflows.

PERSONAL PROJECTS

E-Commerce Website (01/2024 - 03/2024)

- Users can browse a wide range of products, add items to their cart, and complete purchases with ease. Leveraging Firebase for backend services ensures real-time updates and reliable data management, while the payment gateway ensures secure transactions.

Accommodation Website (09/2023 - 10/2023)

- Developed a fully functional accommodation booking website using React.js, allowing users to search and book properties based on location, date, and price range. Integrated dynamic features such as property listings, filters, user authentication, and booking management. Implemented responsive design for seamless mobile and desktop experiences.

Online Learning Platform (01/2024 - 03/2024)

- Developed an online learning platform where users can enroll in courses, track progress, and access video tutorials. Built using React.js and integrated with APIs to manage course content, user accounts, and progress tracking. Implemented features such as course categories, ratings, and user feedback systems.
